

Crypher

White paper

1. Introduction

Cryptocurrency market is very dynamic and full of surprises, so it's hard to keep track of what happens to every coin in circulation. Professional traders Cryptocurrency pours the time to interpret graphics, read forums, feeds in twitter and more.

But, the question is how about for beginners who want to plunge into the world of cryptocurrency? the instability of the crypto market, the sheer amount of news that spreads the uncertainties, fears, and false promises of the coin developers often cost the beginners even before plunging into the market.

There is always a first step for everyone, especially beginners who want to seek profit from cryptocurensi. In the new world of cryptocurrency, beginners are a tantalizing target for fraudsters in the world of cryptocurency. Then, due to the inexperience of the beginners, they need to bribe their deep pockets for being tempted by the offers of fraudsters in the world of cryptocurency. There is a need for a container / place that focuses on minimizing, even eliminating, beginner mistakes in their first step in the world of cryptocurrency.

To guide and direct the beginners, cooperation with senior members who have experience in cryptocurency world is necessary. Can not be denied, senior members need a wage to guide the beginners. Without wages, senior members will prefer other ways to earn profits (eg Signature Campaign, Airdrop, etc) rather than guide and teach beginners. The win-win concept between beginners and senior members is our primary focus, so that beginners and senior members make a profit from what they do.

2. Problem

In 2017, a very extreme boom in the crypto market, new crypto traders enter and increase trade volume, all altcoin and bitcoin cryptocurrencies also increase. This increase makes bitcoin more fluctuating even though its value increases, but still this increases the level of trader stress.

On the other hand, some altcoins have also been circulating over hundreds of millions of dollars, and this is still the beginning.

Source : bitinfocharts.com

From the graph above, shows that slowly Altcoin also began to play an active role in circulation. Even for experienced traders it is still difficult to predict and account for market turbulence, especially for newcomers. New traders do not recognize market trends, and do not have the experience to make good decisions. For people who are just starting to exchange cryptocurrency, the problem of "what to buy" becomes more important.

For newcomers who follow bounty-bounty to get coin in addition to trading also still have many risks. The number of scam projects, scam websites that bring the money away investment from beginner players, and much more.

3. Solution

Crypher provides a solution to the problem. We formed a large and powerful community where everyone not only gathered and discussed but also gave continuous profit to their members. Not only trading to get profit, coin can also be obtained through bounty-bounty in the community, even members just need to actively mmemberikan information, then we will give rewards. This reward is to connect the gap between professionals and beginners because Often active or professional users do not like to share information with new members because for them, sharing information is a waste of time and better focusing on bounty projects in front of their eyes. but in the crypher there will be rewards to the most active users and provide quality tread to other users, this will make crypher members will be happy to share information, because their information is appreciated by the crypher community, this mutual respect that will make this community great. At the crypher forum we want to bring together experienced professionals with people who are new to the world of digital currency.

Unlike other forums that only provide bounty information by just passing email, Crypher provides easy information to its users by directly using mobile apps, Crypher members can easily access information simply using their mobile phone.

4. Why Crypher?

Crypher is a forum that focuses on the delivery of information and discussion on various ways to get digital currency. As we know, the current popularity of digital currency has increased significantly along with rising bitcoin value. The rising popularity of digital currencies is followed by the rise of people interested in investing and seeking digital currency. we would like to invite them to create a community of crypto hunters to share information and exchange opinions so that every member can make a profit.

**Tips and Tricks
Information**

**All coin circulation
is always

5. Feature

1. Newbie Corner

Is a feature where beginners can get help through Live Chat Support. Beginners do not have to wait long to get answers from the senior members. In addition, Senior Members who get recognition from beginner (Asker) will get points that can be converted into CRYPHER coins.

2. NEWBIE can ASK on NEWBIE's Native language

Is a feature incorporated with the Newbie Corner feature, where newbie can ask directly through Live Chat Support based on their Original Language. So, senior members of every language can register themselves to admin / moderator CRYPHER to become Newbie Supporter. For each answer recognized by Newbie (Questioner), Newbie Supporter may obtain POINTS that can later be exchanged to Token CRYPHER.
